Subject: Approval to renumber and reorder current ordinance
Date: Thursday, July 13, 2023 10:02:26 AM

Wes and Dan

We have completed the first phase of our work, which was getting into compliance with the 3 areas of flexibility and 7 areas of restriction from our 1996 agreement with DNR.

In order to finish up the project we need to compare the rest of the code to the model ordinance, request additional amendments, and then present our code to you for DNR approval.

In order for us (and eventually you) to compare the current code to the DNR model ordinance, planning commission and city council agreed that we should reorder and renumber the current code (as amended to date) into the same general order and numbering system as the DNR model ordinance. This allows us (and you) to compare the ordinances side by side, and we like your model ordinance organization and numbering system better too.

May we please get your approval to reorder and renumber our current code to align it with the DNR model ordinance, and allow us to compare and more easily finish the work? This one step involves no word changes, just reordering and renumbering.

Please let me know if I explained this clearly. If you have questions you may call me at 901-647-6135, or we may set up a zoom call.

Thanks
Jeff Breazeale
Chair, Minnetonka Beach Planning Commission
